YOGANATHAN A

FRONTEND DEVELOPER | WEB DEVELOPER | B.TECH IT STUDENT

Email: yoganathan162008@gmail.com • LinkedIn: linkedin.com/in/yoganathana • GitHub: github.com/yoganathan-sys

PROFESSIONAL SUMMARY

Passionate B.Tech Information Technology student specializing in frontend and web development. Experienced in building responsive, accessible, and user-centric web applications using modern web standards. Demonstrated project track record in full-lifecycle interface development, server-side scripting, and cloud database integration. Eager to contribute and grow as a software engineering / frontend intern.

TECHNICAL SKILLS

Frontend Technologies:	HTML5 (Semantic), CSS3 (Flexbox/Grid), JavaScript (ES6+), Bootstrap, Responsive UI
Backend & Languages:	PHP, Python, Flask, C Programming, Relational SQL
Databases & Tools:	Supabase, MySQL, Git, GitHub, REST APIs, Chrome DevTools, Linux/Windows CLI
Core Competencies:	Mobile-First Design, Cross-Browser Compatibility, Algorithm Analysis (Time/Space)

FEATURED PROJECTS

Yoga's Parking System | HTML, CSS, JavaScript, PHP, Supabase — *Live Demo* | *GitHub*

- Developed a web-based parking management application to streamline vehicle slot bookings and live space tracking.
- Integrated Supabase cloud database for secure record management, automated timestamps, and slot status persistence.
- Implemented responsive frontend interfaces with custom CSS layouts for clean mobile and desktop operability.

Medical Shop Website | HTML, CSS, JavaScript, Bootstrap — *Live Demo* | *GitHub*

- Engineered a modern storefront UI tailored for pharmacies to showcase healthcare supplies and prescription items.
- Utilized Bootstrap grid components and custom CSS transitions to ensure fluid UX across phone, tablet, and desktop.
- Structured intuitive product filtering and category navigation using modular vanilla JavaScript DOM scripts.

Code Time & Space Analyzer | Python, Flask, HTML, CSS — *GitHub Repo*

- Built an educational developer tool to profile algorithm execution efficiency and calculate Big-O time and space complexity.
- Designed an intuitive Flask web backend parsing algorithmic code inputs and returning comparative benchmark metrics.
- Crafted a lightweight, dark-themed dashboard visualizing complexity curves and performance metrics.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology — *Degree In Progress*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Web Technologies, Operating Systems, Computer Networks.
- Active focus on practical software development, open-source collaboration on GitHub, and modern web application architecture.
